

DATA APPLICATION FOR RECORD 2 - CATEGORY CONTROL

Fare Family Match using Exclamation Point (!) or Ampersand (&)

The ! or & indicate a match to any alphanumeric character in that position of the fare class.

When using special characters ! or &, a fare class must contain at least the number of characters referenced in the fare class field (additional characters may follow).

An & can be used to indicate a number or alpha in a specific position of the fare class.

Example	Pattern	Valid matches
Example 2	&&TEST	ABTEST, A1TEST, A1TESTA
Example 3	W&2M	WB2M, WC2M, WB2MXRT

Positional rules

W&&2M cannot be used to match WA2M or W2M due to minimal fare class length being five characters.

The matched fare classes are at least six characters for patterns with three ampersands.
